

Connection solutions for thermal management
The power of sealing

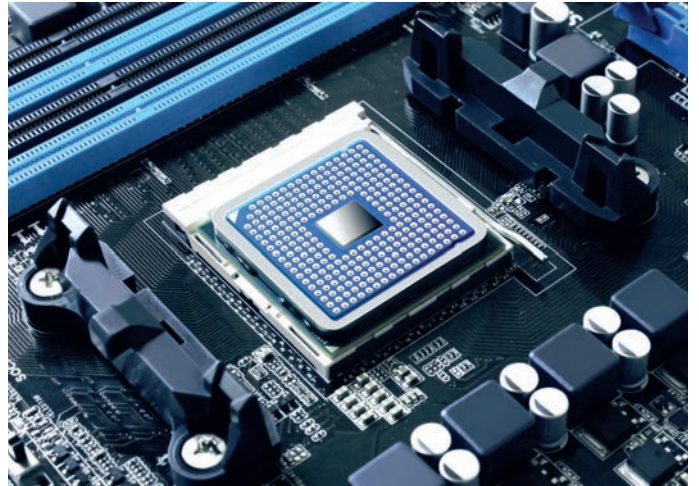

Step up to the plate with Stäubli's perfect and reliable sealing!

Stäubli's quick-release couplings contribute to an improved cooling circuit from the main supply to the various racks.

Stäubli technology ensures the optimum sealing of your circuits. The flush-face connectors enable non-spill connections and disconnections with complete safety throughout the processes.

With Stäubli solutions, the link between cooling liquids and electronics improves overall performance.

Application areas:

Data center
HPC
Internet switch
Communications satellites
Broadcasting
Medical

There are two configurations available, depending on your needs:

MONO CONNECTOR ranges for a direct one-to-one supply:

Simple and efficient

Materials:

- Nickel-plated brass,
- Aluminium
- Stainless steel

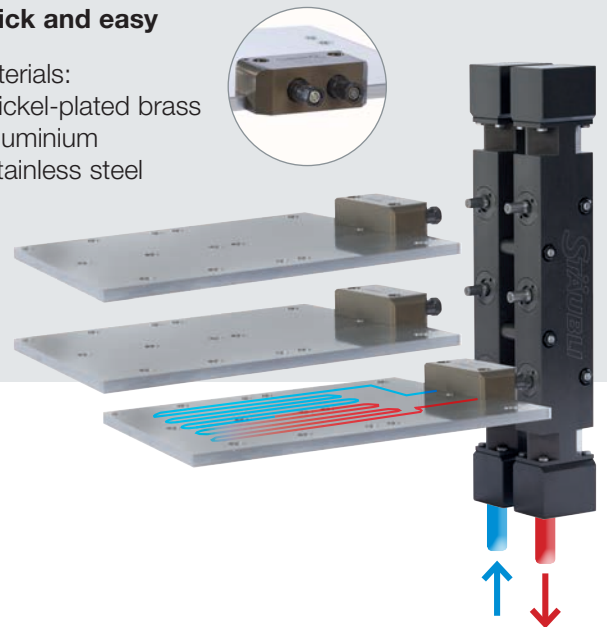

These Thermal Management solutions use Stäubli's expertise in fluid cooling systems. Whatever the application, the fluid composition, or the circuit configuration, Stäubli provides **a solution to fit your needs.**

RACKABLE ranges for simultaneous connection of more than one circuit:

Quick and easy

Materials:

- Nickel-plated brass
- Aluminium
- Stainless steel

RX0700300A
